Focus on Tank Linings Waterline P300

THE DIFFERENCE THE DIFFERENCE

Suitable for drinking water tank and pipe linings, Waterline P300 is a solvent free, high-build epoxy resin coating system, which is moisture tolerant and rapid curing.

Features	Benefits
Hard, smooth water resistant consistency	Provides long term durability.
Application	Can be applied over a wide temperature range, using dedicated application equipment.
The cured lining will not affect the pH of drinking water.	Can be used in soft water regions where cement mortar linings might cause unacceptable increases in the pH of the water supply. Waterline P300 will not affect taste.
Approvals	Approved to Water Supply (Water Quality) Regulation 25 (1). DWI approved as a site and factory applied coating for potable water retaining structures, ref: DWI 56.4.253. Approved to Water Regulations Advisory Scheme Directory ref: 0512526.
High Solids	100% solids volume.

SUPPORT & SERVICE SUPPORT & SERVICE
