

energy

energy

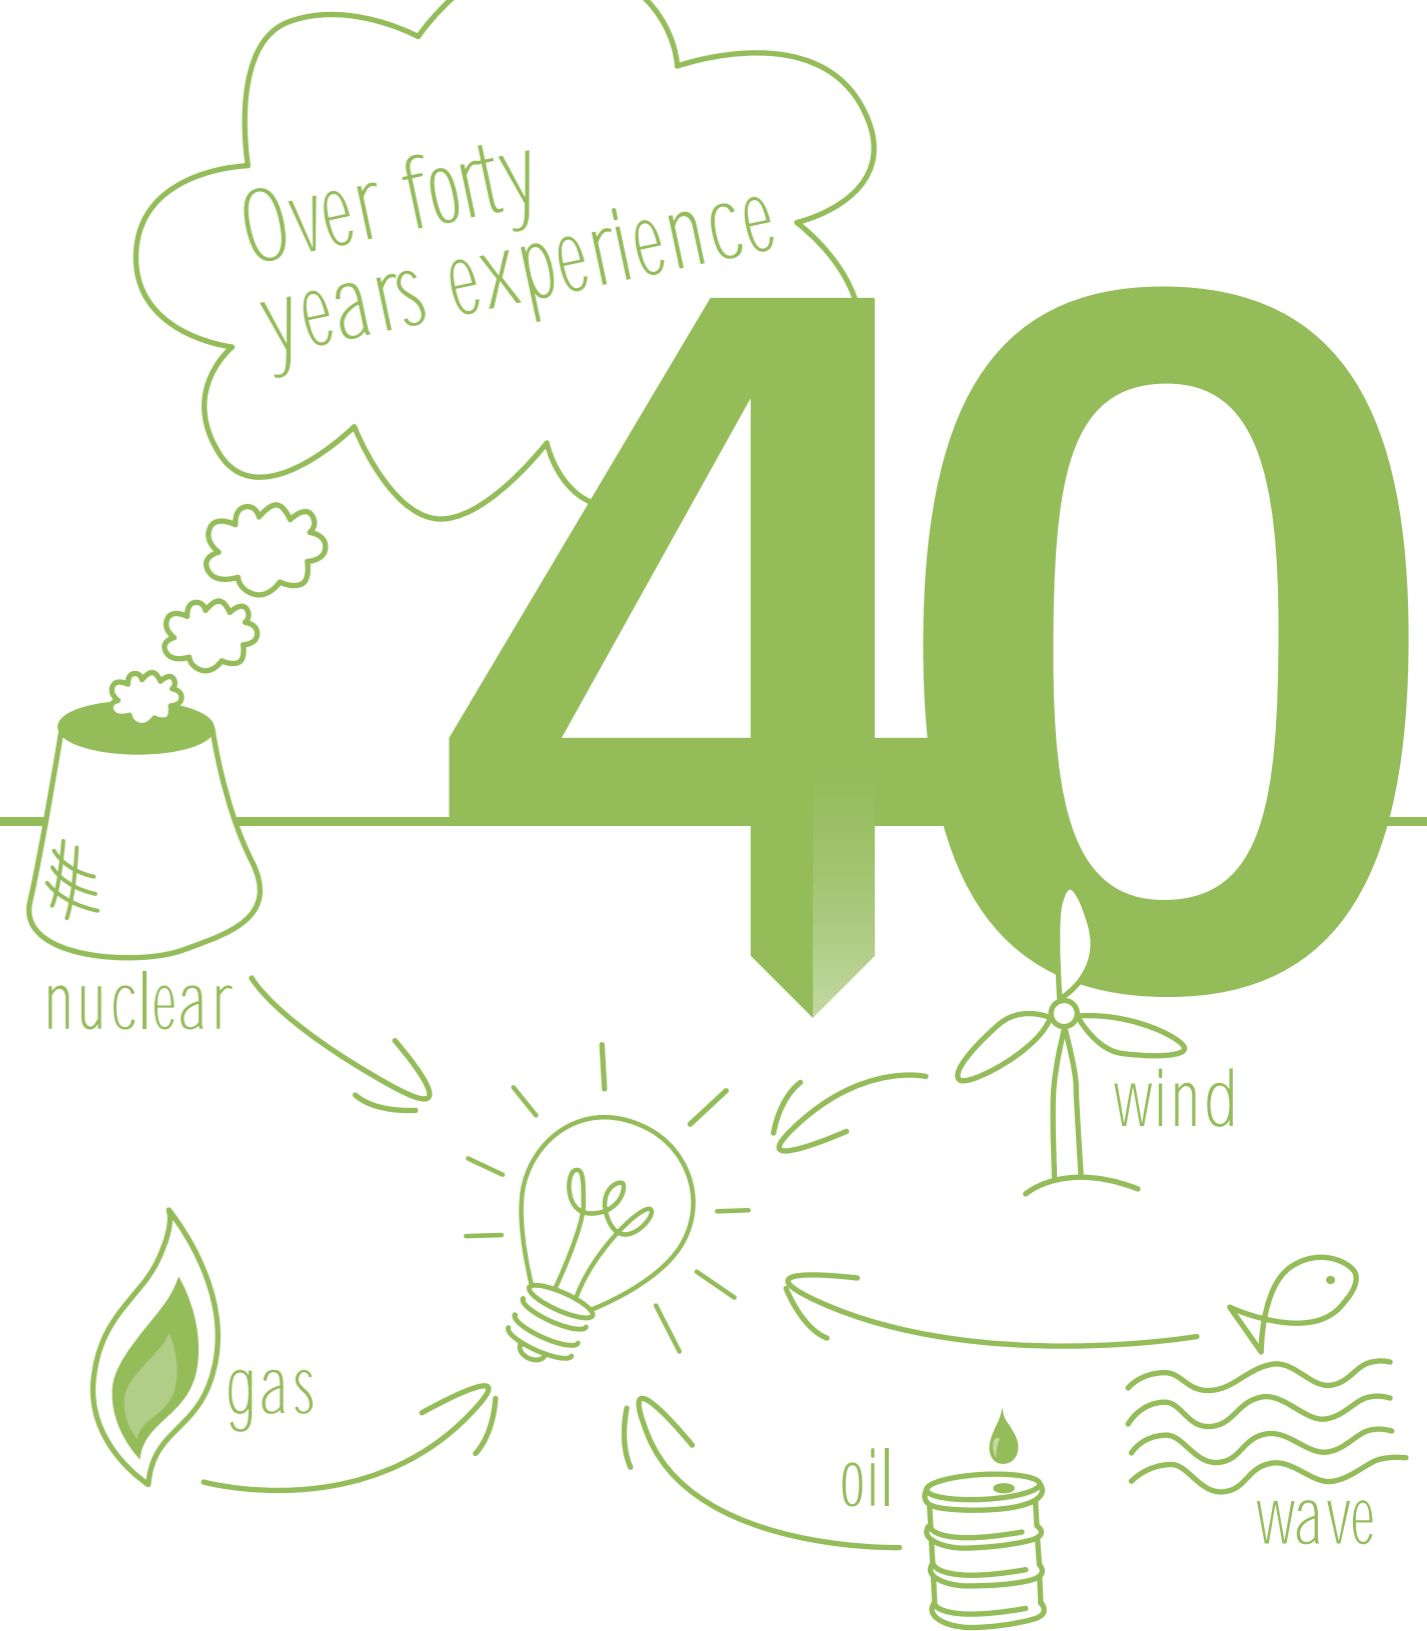

They say experience is **character building**. We would tend to agree. Over **40 years experience** in the **energy industry** has provided us with an **unrivalled understanding** of the requirements of this varied and **technically demanding** market.

We understand that no two projects are ever the same, but we like that challenge. Providing solutions for the industry's problems is what we do best.

With a burning passion to excel and the knowledge and creativity to deliver, Leighs Paints has produced a range of high performance protective coatings, designed to meet the specific needs of the energy industry.

Solution providers

Whether your project is **upstream** or **downstream**, **new build** or **maintenance**, we understand that to **protect your assets** you require the **very best** in **protective coatings**, and so we have **cultivated a unique array** of products, designed to provide you with the **ideal solution**.

Fire protection

Tested and certified to international standards, our hydrocarbon FIRETEX® M90 Series is solvent free, has a low water uptake and possesses inherent corrosion protection, making it the ideal choice where protection against hydrocarbon pool fire, jet fire or blast is required.

Thermal insulation

Offering protection against both cryogenic spillage and fire when used in conjunction with the FIRETEX® M90 Series; our composite system provides you with the perfect protection solution. With exceptional durability and flexibility, the system is tested to extremes to ensure our products perform when you need them the most.

Vessel and Tank linings

Our range of vinyl ester and glass flake epoxy linings are designed to provide long-term protection against corrosion and chemical attack in aggressive environments. This range offers versatility with a proven track record.

Deck systems

We have a comprehensive range of epoxy deck coatings to satisfy all requirements, from the ultimate extra heavy duty aggregated screeds, down to anti-slip suede deck finishes. Our range offers high impact, non-slip, oil, salt and abrasion resistant coatings.

Renewables

Wind or wave; renewable energy farms require tough, durable, long lasting coatings, which stand the test of time. Our corrosion protection ranges are designed and tested to withstand even the harshest weather conditions, wherever the location.

Nuclear

Our range of coatings offer corrosion protection to both steel and concrete structures, and can be decontaminated with ease, providing the perfect solution for nuclear energy facilities that can keep plants operating efficiently for longer periods of time.

More than just paint

At Leighs Paints we don't just provide you with the paint in our tins; there's much more to us than that.

Operating on a global basis, our teams of dedicated specialists are on hand to help you with every aspect of your project. Whether you require the support of our experienced Technical Services team or the guidance of our Customer Service department we provide complete backup at all stages of your project.

With our onsite, world class research and development facility we are able to push boundaries and develop new products fast. Coupled with our leading Supply Chain unit, we can offer high end results, rapid turn around and high quality products delivered to you on time and in full.

The Leighs Paints' way

We love paint. It's our passion, it's what we do. In fact we love it so much that we have been leading the way in the protective coatings industry since 1860.

Founded by two brothers, William and Joshua Leigh, our drive and determination to be the best at what we do has never wavered. In fact with the fourth generation of the Leigh family on board it's stronger today than it ever has been, as we push the business into new and ever demanding markets.

Our unique culture and exceptional service, has ensured that our customers return to us time-after time. Perhaps this is the best testament to our ability to produce world class protective coatings, which exceed customer's expectations.

At Leighs Paints we believe it's not what we do in a day, but how much we love doing what we do that makes the difference. It's the Leighs Paints' way.
